

Indication for Carbon-ion Radiotherapy

【Lung cancer】

[When applicable]

- Lung cancer without lymph node metastasis or distant metastasis (including cases without pathological diagnosis)
- Non-small cell lung cancer with lymph node metastasis but no distant metastasis (pathological diagnosis is required)

[When not applicable]

- Non-small cell lung cancer with lymph node metastasis but no distant metastasis.

In the case of non-small cell lung cancer with lymph node metastasis but no distant metastasis, we recommend conventional chemoradiotherapy.

【Metastatic lung tumor】

[When applicable]

- Small number of metastatic lesions in the lung that are less than or equal to three in number

[When not applicable]

- Metastatic lesions are located outside the lungs and cannot be resected or treated with radical radiotherapy.
