

# Indication for Carbon-ion Radiotherapy

## 【Postoperative recurrence of colorectal cancer】

[When applicable]

- When recurrence occurs in the pelvis after surgery for colorectal cancer (cancer of the rectum, colon, or cecum).

[When not applicable]

- Cases of recurrence in the rectum or colon itself.
- Cases in which the cancer has invaded the bladder or gastrointestinal tract (small intestine or large intestine).
- When there is extensive metastasis to other organs and resection or radical radiotherapy is not feasible.
- When there is an active infection within the treatment area.
